synthetic leather line of dry type Lin Zhenming. Wenzhou Environmental Protection Design & Research Institute Wenzhou Zhejiang 325000 Abstract The study revealed the key of pollution factor from dry type production process in industry of polyurethane synthetic leather and the toxicological damage to human factor and environment. The prevention and improvement measures from point of toxicity were put forward. Keywords PU synthetic leather Solvent Pollution Toxicity Prevention and cure

Study on the production process pollution and the toxicity damage to environment of PU

synthetic leather Solvent Pollution Toxicity Prevention and cure
