The Husserl Page is undergoing a revision both of content and style. Given my work schedule, I believe this entire process will take place over a period of approximately two years (starting July 2008). At present, I am soliciting comments and suggestions for improvements, e.g., links to be included, content you would like to see improved or added, information on philosophers you would like to see or expanded herein, etc.

Please send all such comments to:

bob.sandmeyer@husserlpage.com.

Thank you.

The aim of *The Husserl Page*, which in reality consists of many distinct pages, is twofold. First, this site provides a series of originally created bibliographic and informational pages relevant for research into Husserl's philosophy and development thereof. Second, this site supplies an exhaustive listing of (external) internet sites relevant for research into the life and philosophy of Edmund Husserl. To get a sense of the structure of this site and its contents, you may wish to consult the [site map](#). The map provides a catalog of all the pages herein and indicates their placement. But nowhere in these pages will you find a synopsis, summary, or other such [treatise on Husserl's phenomenology](#), so you may wish to jump to the [chronological bibliography](#) of Husserl's writings. Here you may search for the various "introductions" to phenomenology by Husserl himself. If you are looking for such a text, the *Encyclopaedia Britannica* [article on phenomenology](#) stands as one of the best of Husserl's short works. Finished in the years 1927-28 and (in a heavily edited and distorted version) published in the 14th ed. of *The Encyclopaedia Britannica*, this work was intended by Husserl to be a joint project between himself and Martin Heidegger. (The collaboration failed, however, and Heidegger's contributions were not ultimately incorporated into the article submitted for publication. Hence, the article can serve both as an introduction to Husserlian phenomenology and as a platform by which to examine similarities and differences in the Husserlian and Heideggerian philosophies.) While not as dense as the *Cartesian Meditations* or as fragmentary as the *Crisis* texts, the *Encyclopaedia Britannica* article provides a concise, readable and mature statement of Husserl's transcendental phenomenology. An adequate translation can be found in *Husserl: Shorter Works*, edited by Frederick Elliston & Peter McCormick or Joseph J. Kockelmans' book, *Edmund Husserl's Phenomenology*. Without question, the best source for this text is Thomas Sheehan & Richard Palmer's edition of the Husserliana Collected Works, Volume 6, *Psychological and Transcendental Phenomenology and the Confrontation with Heidegger*. Copies of these books can be found most likely in an [academic library](#), at a good bookseller, through the publisher or, surprisingly, [online](#).

- **"DICCIONARIO HUSSERL - HUSSERL WÖRTERBUCH - HUSSERL DICTIONARY" PROJECT NEW**

The "Diccionario Husserl - Husserl Wörterbuch - Husserl Dictionary", whose aim is to be an important aid in the study of Husserl works, is a vast compilation of Husserlian expressions which are "defined" or clarified directly by textual passages from Husserl works. The vocabulary and the passages themselves are both in Spanish and German, and the site has a Spanish and a German interface. In the first version now published, the Dictionary embraces only 6 Husserl works, but it intends to expand to cover the whole of Husserl works translated into Spanish. The Husserl Dictionary project is developed by Antonio Ziri3n Q. at the Seminario-Taller de Estudios y Proyectos de Fenomenolog3a Husserliana, at UNAM and the Universidad Michoacana, Mexico.

- ***Husserliana Materialien, Bd. 8: Späte Texte über Zeitkonstitution (1929-1934). Die C-Manuskripte.***

"The present volume contains research manuscripts by Edmund Husserl pertaining to the problem of time which he wrote during the years between 1929 and 1934. With the publication of the C-manuscripts, the final phase of Husserl's analyses of every level of time-constitution has been documented. These analyses began first with the lectures on the phenomenology of inner time-consciousness (Husserliana X) and continued in the Bernauer manuscripts (Husserliana XXXIII). In the C-manuscripts, egoic time-constitution comes under investigation proceeding from the field of experience of the concrete lived present. He aims in particular to provide a clarification of the transition of the extended and continually living flowing present of the experiencing subject to objective communally constituted time. These research manuscripts range over numerous further themes in Husserl's late work in addition to time-constitution." -- In German.

- ***Edmund Husserl Collected Works, Vol. 11: Phantasy, Image Consciousness, and Memory (1898-1925).***

"This is the first English translation of Husserliana XXIII, the volume in the critical edition of Edmund Husserl's works that gathers together a rich array of posthumous texts on representational consciousness. The lectures and sketches comprising Husserliana XXIII come from a period of enormous productivity and pivotal development in Husserl's philosophical life, extending from the years immediately preceding the Logical Investigations (1900-01) almost to the time of his retirement in 1928. They make available the most profound and comprehensive Husserlian account of image consciousness—the awareness we have when we look at a picture or see a play—and of its relation to art and the aesthetic. They explore phantasy in depth, and furnish nuanced accounts of perception and memory. They enrich the Husserlian analysis of time consciousness and offer a fascinating picture of the sometimes tortuous paths Husserl took in his efforts to comprehend how the forms of representation are constituted and how they are related to one another and to perception. *Phantasy, Image Consciousness, and Memory* should prove to be an indispensable resource for Husserlian phenomenologists and for anyone else interested in thinking about these fundamental phenomena."

- ***Husserliana Materialien, Bd. 7: Einführung in die Phänomenologie der Erkenntnis. Vorlesung 1909.***

Der vorliegende Band enthält den Text der Vorlesung, die Husserl unter dem Titel „Einführung in die Phänomenologie der Erkenntnis" in Göttingen im Sommersemester 1909 gehalten hat. Im ersten Teil dieser Vorlesung setzt Husserl sich mit dem Verhältnis von „allgemeiner Phänomenologie und phänomenologischer Philosophie" auseinander. Nicht nur in diesem Titel, sondern auch in seinem Inhalt enthält dieser Teil eine Vorzeichnung des Gedankengangs der Ideen. Der zweite Teil der Vorlesung ist speziellen Wahrnehmungsanalysen gewidmet, die sich an die entsprechenden Untersuchungen im ersten Teil der Vorlesung von 1904/1905 (Husserliana XXXVIII) und in der Dingvorlesung von 1907 (Husserliana XVI) anschließen und diese fortführen.

Husserl Archives

● The Husserl-Archive in Leuven (Belgium)

Without question, the various archives represent the most important addition to Husserl scholarship on the Internet. Founded in 1939 by H.L. Van Breda, the Archives at Leuven are the central repository of Husserl's manuscripts, philosophical library and correspondence. Presently under the direction of Rudolf Bernet, the Husserl-Archives are available to scholars interested in studying these important collections. This web site provides an overview of the Archive's [history and aims](#), [staff](#), [editions and publications](#), [Identitätsverzeichnis](#), [Mitteilungsblatt](#) or yearly newsletter, forthcoming events, facilities and address information and links of interest outside the Archives.

The essay moves from an initial discussion of Husserl's life and work to cover the following topics: pure logic, meaning, intuitive fulfillment and intentionality; indexicality and propositional content; singularity and horizon-intentionality; the phenomenological *epoché*; local *epoché*, perceptual noema, *hyle* and time-consciousness; empathy, intersubjectivity and lifeworld; and the intersubjective constitution of objectivity. It also provides a bibliography, list of Internet resources and links to related entries. Written by Christian Beyer.

● [Glossary Guide for Translating Husserl \(Mexico\) Versión en español](#)

"The first and foremost aim is to establish a glossary that can be used as a guide for translating the works of Edmund Husserl into Spanish, so the future translations (including the future editions of those already existent) can achieve a terminological uniformity based on a reasonable consensus, a uniformity desirable in cases, such as this one, of the translations of scientific texts.

The ultimate aim, in whose stepwise realization I ([Antonio Zirión](#)) am inviting the phenomenological community to participate, is giving the glossary a multi-lingual character, so that it may serve to aid in the translation of the works of Husserl to every language dead or alive. This multi-lingual glossary will be, naturally, a development of the one initiated by [Dorion Cairns](#) in his *Guide for Translating Husserl*."
