Article from the Stanford Encyclopedia of Philosophy, by Michael Pritchard.

Journals

- [Analytic Teaching](#)
"Analytical Teaching from its first issue, set out a broad agenda within the context of Philosophy of Children. This tradition continues. Areas of interest to readers and contributors include Philosophy for Children teachers and teacher trainers but also included those interests in the role of narrative in teaching and learning, liberation pedagogy, Vygotskian psychology, and cognitive science, among other areas. The broad agenda might be defined as reflective teaching and community inquiry. These two areas will continue to be the mainstay of contributions to Analytic Teaching."
- [Think](#)
Published by the [Royal Institute of Philosophy](#); edited by Stephen Law. "The central aim of THINK is to provide to a very wide audience - including schools, colleges and the general public - highly accessible and engaging writing by philosophers pre-eminent in their fields"

Australasia

- [Owl Project](#)
Based at the University of Tasmania; co-ordinator, Judy Keen. A somewhat obscure page; perhaps it depends on Javascript gimmickry for its features, but I could see nothing except some fairly cryptic text: "a place where you can discover new books, publish your own reviews, read the opinions of others, and become involved in a dialogue about books/publish your own writing/a place for philosophical dialogue arising from fun

stories/interesting problems to think about/discuss the topic of light/stimulating ideas for parents of preschool children".

- [Queensland Association of Philosophy in Schools](#)

A peculiarly spread-out page; if you think there's nothing there, scroll down -- and down, and down, and down... If you're using a text-based browser, be prepared for a hostile welcome.

- [Victorian Association for Philosophy in Schools](#)

"exists to promote the teaching of philosophy in schools, whether primary or secondary, government or independent. Membership is open to individuals or schools with an interest in this objective."

On-line text of a book on the history of philosophy, from a Marxist viewpoint. Be careful; his accounts of philosophers are often full of (both traditional and more Marxist-influenced) errors.
