welcome

The Centre for Microdata Methods and Practice (cemmap) is an [ESRC Research Centre](#). Through research, teaching and national and international networks, cemmap provides a focus for development, understanding and application of methods for modelling individual behaviour, the influences on it and the impact of policy interventions.

Cemmap works with the ESRC [National Centre for Research Methods](#) (NCRM) to develop research tools and training for social science practitioners.

upcoming events

[22-23 March 2010](#)

cemmap Conference

Econometric analysis of scanner data

[16-17 April 2010](#)

cemmap Conference

Matching and sorting: theory and applications (a cemmap / ANR conference)
