Public Utilities: Privatization without Regulation

[Tarola, Ornella](#)

Year: 2010 Volume: 4 Issue: 1 Pages: 62-78

**Abstract:** In the last decades, transitional countries of Central and Eastern Europe have engaged in strong privatization programs of public utilities. However, a large part of them did not meet legal and economic conditions needed for a market economy to take place. In this paper, we study how a firm producing a public utility and moving from a public ownership to privatization and thus adopting a profit-maximizing criterion defines its production plans, when an appropriate regulatory environment is still lacking.

JEL classification: C61, D21, L11, L33

Keywords: Privatization, public utilities, dynamic programming
