Agric. Econ. – Czech

Š. Buday

Development trends in land market prices in Slovakia

Agric. Econ. – Czech, 51 (2005): 207-211

After the accession to the EU, there is a necessity to develop the land market in Slovakia. The achievement of the following conditions is necessary: settlement of estates in lands and unification of the law of real property in the areas of ownership, utilization, change of the land type, soil conservation, land use planning and

building multiple-function agriculture with the legislation of the market economy countries as well as its harmonization with the EU legal regulations. It is also necessary to develop an official network to follow transactions on the land market, a regular update of data and their evaluation.

Keywords:

market price of land, acreage of parcels, land ownership, agricultural land market
