

# A Multi-Level Lorentzian Analysis of the Basic Structures of the Daily DJIA

[Frank W. K. Firk](#)

(Submitted on 27 Apr 2012)

A quantitative analysis of the basic components of the daily DJIA. The parameters of the underlying Lorentzian states are obtained by fitting the data. Statistical properties of the states are discussed. This is a practical development of the general method introduced in [arXiv:1203.6021](#).
