# Insurance: a Bayesian approach to non- life reserving

[Edward Hoyle](#),  
[Lane P.](#)  
[Hughston](#),

*(Submitted on 4  
May 2010 (v1), last  
revised 22 Sep  
2010 (this version,  
v2))*

We  
develop  
a non-  
life  
reserving  
model  
using a  
stable-  
 $1/2$   
random  
bridge to  
simulate  
the  
accumulation  
of paid  
claims,  
allowing  
for an  
arbitrary  
choice of  
a priori  
distribution  
for the  
ultimate  
loss.
