# Agric. Econ. – Czech

## Svatoš M. Specific aspects of globalization

Agric. Econ. – Czech, 53 (2007): 65-68

The decisive role of globalization processes and development tendencies has many positive and negative effects in economic (foreign-trade), environmental, and (bio) technological areas. From the evolution point of view still very successful human adaptation strategy hit the basic limit given by the capacity of the Earth biosphere. The evolution determinants of human society and their economic or technological activities manifesting themselves by global

problems can find way out of sustainable development. The application of the so-called preventive principle represents a great dilemma.

**Keywords:**

globalization, sustainable development, WTO, evolution
