Predication of  
forces and per  
expenditures  
development in  
food industry  
branches in th  
Republic till 20**

Agric. Econ. – Czech, 53  
137

Production of food and be

of the Czech traditional  
processing industry. The  
describe the model predic  
sector structure developm  
labour and personal costs  
sector up to 2013 and it is  
continuous monitoring of t  
in the period 2000–2005.  
analysis of time orders, th  
the method of exponential  
With regard to certain ant  
tendencies, i.e. the lasting  
number of workers in the r  
period but at the same tim  
personal costs, there were  
separate predictions of the  
up to 2013, aimed namely  
companies with 20 and m  
The prediction of the selec  
the year 2013 is based on
