Agric. Econ. Czech

**Střeleček F., Los
J., Zdeněk R.:
Economic results
agricultural holdings
in less favoured**

Agric. Econ. – Czech, 54 (2012), 520

The profit/loss of agricultural holdings in the LFA is decreased due to unfavourable conditions of climate and production. A disadvantage should be compensated by the "compensatory payment" in the LFA that should support the use of agricultural land and the rural region. The preparation

delimitation of the LFA should be determined according to the analyses of impacts and the proper evaluation of the current state as its impacts do not significantly influence the competitiveness of agriculture. This paper summarises the results of an economic indicators analysis of agricultural holdings in the Czech Republic in the LFA and outside of it, and the influence of subsidies on their profit/loss.

Keywords:

LFA (Less Favoured Areas), profit/loss, subsidies
