## Value added and generation in ag enterprises

Agric. Econ. – Czech, 50 (2  
242

This article sets out to analyze the value added generation sector at the time of the accession to the EU compared to v lagging behind in the overall generation of gross value add of the value added generation over the recent years in a gr enterprises being legal entities indicates that the enterpris terms of value added generation is markedly differentiated conditions of the locations where individual businesses ope the added value between enterprises can also be found in having the same natural conditions. The reason for this is a degree to which intensification inputs are utilized due to hig resources, inefficient combination of inputs used and insuffi importance of the value added by managers, particularly in structures and production finalization grade.

### Keywords:

intermediate consumption, a  
natural conditions, productio
