### Abstract

The editors of the present Special Collection of the electronic journal Demographic Research take pleasure in making the Collection available to the research community and the general public. The Collection's principal focus is the demographic analysis of European fertility trends, their determinants, and public policies modifying childbearing. The collection is the outcome of an international comparative project. It includes nineteen country studies, eight topical overview chapters, and a summary.

### Author's affiliation

Jan M. Hoem

Max Planck Institute for Demographic Research, Germany

### Keywords

childbearing, Europe

### Related links

You will find all publications in this Special Collection "Childbearing Trends and Policies in Europe" at <http://www.demographic-research.org/special/7/>

### Word count (Main text)

1053

### Other Articles by the same author/authors (in *Demographic Research*)

[19-10] Overview Chapter 8: The impact of public policies on European fertility

[19-2] Summary and general conclusions: Childbearing Trends and Policies in Europe
