The labor force experience of women from 標 eneration X?/b>

Marisa DiNatale

Economist, Division of Labor Force Statistics, Bureau of Labor
Statistics.

Stephanie Boraas

Economist, Division of Labor Force Statistics, Bureau of Labor
Statistics..

Women aged 25 to 34 years in 2000 participated in the labor force in greater proportions, were more educated, earned more, and generally enjoyed more labor market benefits than their counterparts 25 years earlier; moreover, the 標arnings gap? between young women and men narrowed substantially over the period.
