Comparing PPI energy indexes to alternative data sources

Katherine A. Klemmer and Joseph L. Kelley

Economists, Office of Prices and Living Conditions, Bureau of Labor Statistics

The trend in measures constructed using alternative sources of price data for energy products tracks fairly well with changes in the Producer Price Index. This article presents the results of one such test, which focuses on the important and price-volatile group of energy commodities, as arrayed within a stage-of-processing system of price indexes.
