The U.S. economy to 2016: slower growth as boomers begin to retire

Betty W. Su

Economist, Division of Industry Employment Projections, Office of Occupational Statistics and Employment Projections, Bureau of Labor Statistics.

E-mail: su.betty@bls.gov

Real GDP growth is expected to average 2.8 percent a year over the next decade, less than its previous 10-year trend, while productivity growth is expected to slow as well; continued increases in defense spending and strong foreign markets also characterize the outlook for the coming decade.
