Article by Huang, Q.

Present study suggests that the academic degree system in China should sever its tie with diploma system, and modern scientific knowledge should break through the shackles of diploma system and gradually popularize through the fundamental degree course teaching. Students should enhance their ability from practice after they master the essential basic knowledge, and they can change their fate at low cost, which will pump fresh energy for China economy.

Keywords: higher education; academic degree system; diploma system; fundamental degree course of university
