贺玉勋, 肖建安

(湖南工业大学外国语学院, 湖南株洲, 412008)

摘要: 在元话语框架下, 话语中的名词与代词的重音变异原则具有多标准性与矛盾性。重音是元话语标记, 它的变异旨在调控听者的注意状态, 并通过信息度标示实现。在口语语篇中, 元话语标记可在句法与音系两个层面进行分类, 其中重音属于音系层面的元话语标记。

Discourse stress variation: Perspective of meta-discourse theory

HE Yuxun, XIAO Jianan

(School of Foreign Languages, Hunan University of Technology, Zhuzhou 412008, China)

Abstract: Seen from the perspective of meta-discourse theory, the standards of stress variation and pronouns in spontaneous speech are diverse and contradictory. Stress is treated as a meta-discourse marker and its variation is to help regulate the listener's attention by labeling the prominence of the information. The article argues that in spoken discourse, meta-discourse markers can be classified into syntactic markers or phonological ones, and stress belongs to phonological meta-discourse markers.

KeyWords: meta-discourse; stress; variation
