

Scraps on the Album

<http://www.firstlight.cn> 2007-12-31

We launch here a new section entitled Scraps on the Album, which we hope will continue to appear from time to time in future issues, offering occasional papers on individual albums as well as album collections. The Scraps bulletin will provide an informal forum in which to share snippets of information, shorter papers, and generally foster discussion around new research, collections and projects on albums. We are very pleased to launch Scraps with a very special contribution from Louis James, who introduces us to William Hone's Everyday Book.
