Art & Visual Culture

The Art and Visual Culture Department increases a student's potential for full artistic expression, interpretation, and comprehension. By providing sound training in art analysis, drawing, film & video production, new media, painting, photography, sculpture, and art history, the curriculum enhances students' creative thinking and technical skills, while allowing them to concentrate their coursework in an area that best suits their personal and professional interests.

Possibilities

- Students may major in Art, pursuing either our [Studio Arts](#) or our [Visual Culture track](#) (as detailed in the Catalogue)
- Students, regardless of major, may seek to gain expertise through our [Museum Management Program](#).

Classroom learning is complemented by regular exposure to local and regional artists and exhibitions. Students may also qualify for [financial aid](#) and art scholarships.
