摘要

关键词   Post algebra   Post equation   general solution   Horn sentence

分类号

Abstract In a previous paper, we have described all reproductive general solutions of a Post equation, supposing that a general solution is known. In this paper we describe all general solutions of Post equation, supposing that a general solution of this equation is known (Theorem 6). As a special case we get the previous characterization of reproductive solutions and a similar result for Boolean equations (Theorem 9).

Key words   Post algebra   Post equation   general solution   Horn sentence
