

Non-trivial Compositions of Differential Operations and Gateaux Directional Derivative

Branko J. Malesevic, Ivana V. Jovicic

(Submitted on 31 Oct 2010)

This paper is devoted to the enumeration of non-trivial compositions of higher order of differential operations and Gateaux directional derivative in \mathbb{R}^n . We present recurrences for counting non-trivial compositions of higher order.

Comments: Paper presented at 0-1 Matrix Theory and Related Topics Conference, June 2010, Coimbra, Portugal

Subjects: **Combinatorics (math.CO)**; Differential Geometry (math.DG)
