

# Confluent A-hypergeometric functions and rapid decay homology cycles

Alexander Esterov, Kiyoshi Takeuchi

(Submitted on 2 Jul 2011 (v1), last revised 17 May 2012 (this version, v4))

We study confluent A-hypergeometric functions introduced by Adolphson. In particular, we give their integral representations by using rapid decay homology cycles of Hien and obtain a formula for the asymptotic expansions at infinity of confluent A-hypergeometric functions.
