

# Topos co-évanescents et généralisations

[Ahmed Abbes](#), [Michel Gros](#)

(Submitted on 12 Jul 2011)

This article is devoted to studying a topos introduced by Faltings for the purpose of  $p$ -adic Hodge theory. We present a new approach based on a generalisation of Deligne's co-vanishing topos. Along the way, we correct Faltings' original definition.
