

# Automorphisms of Drinfeld half-spaces over a finite field

Bertrand RÉMY (ICJ), Amaury Thuillier (ICJ), Annette Werner

(Submitted on 5 Jun 2012 (v1), last revised 27 Nov 2012 (this version, v3))

We show that the automorphism group of Drinfeld's half-space over a finite field is the projective linear group of the underlying vector space. The proof of this result uses analytic geometry in the sense of Berkovich over the finite field equipped with the trivial valuation. We also take into account extensions of the base field.
