Abstract Recently, Lutwak, Yang and Zhang posed the notion of L_p -projection body and established the L_p -analog of the Petty projection inequality. In this paper, the notion of L_p -mixed projection body is introduced---the L_p -projection body being a special case. The Petty projection inequality, as well as Lutwak's quermassintegrals (L_p -mixed quermassintegrals) extension of the Petty projection inequality, is established for L_p -mixed projection body.
