

Localising subcategories for cochains on the classifying space of a finite group

Dave Benson, Srikanth B. Iyengar, Henning Krause

(Submitted on 24 Jul 2011 (v1), last revised 26 Aug 2011 (this version, v2))

The localising subcategories of the derived category of the cochains on the classifying space of a finite group are classified. They are in one to one correspondence with the subsets of the set of homogeneous prime ideals of the cohomology ring $H^*(G, k)$.
