

On some Leindler's theorem on application of the class NMCS

Włodzimierz Łenski, Bogdan Szal

(Submitted on 13 Apr 2012)

We show the results in the class GM(5b) corresponding to the theorem of L. Leindler [A note on strong approximation of Fourier series, *Analysis Mathematica*, 29(2003), 195--199] on strong approximation by matrix means of Fourier series constructed by the sequences from the class NMCS.

Subjects: **Classical Analysis and ODEs (math.CA)**

Cite as: **arXiv:1204.2939 [math.CA]**

(or **arXiv:1204.2939v1 [math.CA]** for this version)
