A nonlinear degenerate elliptic problem with $W^{1,1}_0$ solutions

[Lucio Boccardo](#), [Gisella Croce](#) (LMAH), [Luigi Orsina](#)

(Submitted on 6 Jul 2011)

We study a nonlinear equation with an elliptic operator having degenerate coercivity. We prove the existence of a unique $W^{1,1}_0$ distributional solution under suitable summability assumptions on the source in Lebesgue spaces. Moreover, we prove that our problem has no solution if the source is a Radon measure concentrated on a set of zero harmonic capacity.
