**Abstract:**

In this paper, we prove Young's inequality in quaternion matrices: for any  $n \times n$  quaternion matrices  $A$  and  $B$ , any  $p, q \in (1, \infty)$  with

$$\frac{1}{p} + \frac{1}{q} = 1, \text{ there exists } n \times n \text{ unitary quaternion matrix } U \text{ such that}$$
$$U|AB^*|U^* \leq \frac{1}{p}|A|^p + \frac{1}{q}|B|^q.$$

Furthermore, there exists unitary quaternion matrix  $U$  such that the equality holds if and only if  $|B| = |A|^{p-1}$ .
