**Abstract:** Let  $\phi$  be a holomorphic self-map of the open unit polydisk  $U^n$  in  $\mathbb{C}^n$  and  $p, q > 0$ . In this paper, the generally weighted Bloch spaces  $B_{\log}^p(U^n)$  are introduced, and the boundedness and compactness of composition operator  $C_\phi$  from  $B_{\log}^p(U^n)$  to  $B_{\log}^q(U^n)$  are investigated.
