

Cellular Automata, PDEs, and Pattern Formation

Xin-She Yang, Y. Young

(Submitted on 9 Mar 2010)

State-of-the-art review of cellular automata, cellular automata for partial differential equations, differential equations for cellular automata and pattern formation in biology and engineering.

Comments: 12 pages

Subjects: **Cellular Automata and Lattice Gases (nlin.CG)**; Pattern Formation and Solitons (nlin.PS)

Journal reference: X.-S. Yang and Y. Young, Cellular Automata, PDEs and Pattern Formation (chapter 18), in: Handbook of Bioinspired Algorithms and Applications (Eds S. Olariu and A. Y. Zomaya), Chapman & Hall/CRC Press, pp. 271-282 (2005).

Cite as: **arXiv:1003.1983v1 [nlin.CG]**
