(Received: 2006-5-29; Revised: 2006-9-11)

Abstract: By constructing a series of mixture, which is inseparable but satisfies the Mermin-Klyshko inequality, for the N-qubit system, we prove that " violation of the Mermin-Klyshko inequality" is not equivalent to " the state is inseparable" .

PACS: 03.65.Ud

Key words: nonlocality, entanglement
