(Received: 2006-4-24; Revised:)

Abstract: The exact solution of a new type of Bariev Hamiltonian constructed with particles which obeys generalized exchange statistics in one dimension is studied in the framework of coordinate Bethe ansatz method. The energy spectrum and the related Bethe ansatz equations are obtained.

PACS: 05.50.+q, 75.10.Hk, 75.10.Jm

Key words: Bariev model, fractional statistics, coordinate Bethe ansatz
