(Received: 2002-8-21; Revised: 2002-9-28)

Abstract: We verify that the total angular momentum 3-vector defined by the author [X. Zhang, Commun. Math. Phys. 206 (1999) 137] is equal to  $(0,0,ma)$  for any time slice in both the Kerr and the Kerr-Newman spacetimes.

PACS: 02.40.Ky, 04.20.Cv

Key words: total angular momentum, general relativity
