# evolution: genetics versus memetics

[Brandon Carter](#)

*(Submitted on 15  
Nov 2010)*

The last  
few  
million

years on  
planet  
Earth  
have  
witnessed  
two  
remarkable  
phases  
of  
hominid  
development,  
starting  
with a  
phase of  
biological  
evolution  
characterised  
by rather  
rapid  
increase  
of the  
size of  
the  
brain.  
This has
