您好, 目前预印本系统的用户信息已经并入NSTL网络服务系统之中, 如果您要提交或者管理个人论文, 请返回NSTL系统首页进行登录, 然后再访问预印本系统;

同时, 新用户的注册也请到NSTL首页去完成。

原“国外预印本门户”, 因丹麦科技大学图书馆技术信息中心关闭其平台而停止服务。

【标题】: Full revision of "单元体系宇宙"and "Homogenous Cosmos Originated from Unique Genesis"
【作者】: Yang-guosheng
 作为认识历史延续, "单元体系宇宙"是从传统科学有关"物质微观结构趋同性"认识积累中延伸出来的"宇宙重认识和重定义", ——源自"宇宙单元体系假设"、关于整个宇宙构造及其宇宙物质性存在与运动变化的"单一线性逻辑体系"。它将传统科学有关"物质微观结构趋同性"认识普及推广至"宇宙单元体系假设", 继而将宇宙内涵"时空"与"物质"代入"宇宙单元体系假设", 导出时空与物质间的体系性"PNT关系(或PNT行为)", 并相继导入"PNT趋本能假设"以定格PNT行为准则, 以致关于"宇宙物质于时空中存在与运动变化"的"PNT动力学"为之原形毕露。"宇宙单元体系"观念的导入和实地澄清将意味着科学技术的全面革新。

【TITLE】: Homogenous Cosmos Originated from Unique Genesis
【AUTHORS】: Yang-guosheng
 As outgrowth of sequential historical cognition progress, Homogenous Cosmos Originated from Unique Genesis is successive recognition & redefinition of cosmos extended from temporal knowledge amassment of traditional sciences about factuality that microcosmic components of matter gradually tend to the same nature along microcosmic tendency, ——a coherent "linear logic system" about cosmic holistic configuration and universal existence & motion of matter in cosmos extended from unique presumable precondition. It above all changed the knowledge amassment about factuality that microcosmic components of matter gradually tend to the same nature along microcosmic tendency of traditional sciences into Homogenous cosmos originated from unique genesis assumption, then, it inputted tangible cosmic endosome of spacetime and matter into Homogenous cosmos originated from unique genesis assumption as to educe the homology attribute and PNT correlation (or PNT action) between spacetime and matter, and it successively introduced PNT instinctive equilibrium assumption as to confirm the behavioral orientation fundamental of PNT action further, so that it made the PNT dynamics about universal existence & motion of matter in spacetime consequently betray itself. The introduction and further demonstration of idea of homogenous cosmos originated from unique genesis will lead to radical revolution of sciences and technologies.
