Abstract. Based on investigation and sample test, the color rabbit hair has good spinnability. For comfortable, dressing property well and environment, it plays an important role in market. The suggestions were that color rabbit hair be produced and its added value be developed as leather material. Offal hair of color rabbit may be developed in market possess good foreground. It should be developed.

Introduction

Color rabbit hair can form special color needing. It is accorded with the modern textile idea of environmental, natural wool textile variety and natural protein fiber. It is beautiful. There is a few part of rabbit hair product in market should be developed. Color rabbit hair fiber

Spinnability of color rabbit hair

Test on color rabbit hair length and fineness. Color rabbit hair bred for more than twenty years by zoologist from the beginning, there was a few Angora as a variety in France, did not developed in large scale. Having introduced from USA by Luzhou Economic Animal Science Institute forms a new variety of rabbit. In present, color rabbit bred in Shandong Province, Jurong, Jiangsu Province and other natural colors such as dark, gray, blue, brown, yellow, bred in majority.

Samples were tested collected from Jurong, Jiangsu Province, Baodi, Tianjin. The color is brown, dark, yellow.

It was shown that color rabbit fine hair length and fineness

Tested result of white rabbit hair length and fineness

Sample tested result shows that the white rabbit hair length 13.46~15.28 um. The length and fineness range color rabbit hair but there are no great changes. It shows that length meets spinning demand. The fineness of color rabbit hair is more fitted spinning than white rabbit.
