The Canadian Mathematical Society is pleased to announce the 2006 Endowment Grants Competition to fund projects that contribute to the broader good of the mathematical community. The Endowment Fund is used to fund such projects and the Endowment Grants Committee (EGC) administers the distribution of grants and adjudicates proposals for projects. Depending on the performance of the CMS Endowment Fund, the funds available for this year's competition may be lower than past years.

Proposals must address the goal and mission of purpose of the Canadian Mathematical Society.

The goal of the Canadian Mathematical Society is to support the promotion and advancement of the discovery, learning, and application of mathematics. The CMS Statement of Purpose is:

To study and support Canadian mathematics through effective communication, broad membership, sponsorship of diverse activities, and partnerships with like professional societies.

To support mathematics research through the communication of current research to both the specialist and non-specialist, through recognition of achievement and collaboration with the mathematics and science agencies.

To support the improvement of mathematics education through the communication of educational advancements, and partnerships with provincial ministries of education and organizations supporting mathematics education.

To champion mathematics through initiatives that explain, promote and increase the general understanding of mathematics, provide career opportunities for students, and encourage partnerships with corporate, government and non-for-profit agencies.

An applicant may be involved in only one proposal per competition as principal applicant. Proposals must come from CMS members, or, if joint, at least one principal applicant must be a CMS member.

The EGC will consider funding requests for projects up to \$15,000 per year. However, smaller projects may be funded from the funds available in the EGC Endowment Fund.

The EGC committee tends to favour proposals where CMS funds can be leveraged or where proposals have an other named funding body to which it is apply.

If it is anticipated that a proposal will generate something of lasting financial value, proposers must indicate that this is the case and declare their intent with respect to that value.

Application process

Application forms and samples as well as advice and directions are available at the CMS website [www.cma.math.ca/Grants/EGC](http://www.cma.math.ca/Grants/EGC). Proposals must be received no later than September 30, 2006.

The Chair of the Endowment Grants Committee invites emails expressing interest in the grant as soon as possible. Dr. Karl Dilcher

Chair, Endowment Grants Committee Canadian Mathematical Society 777 King Street, Waterloo, ON N2L 3G1 e-mail: [karl@math.uwaterloo.ca](mailto:karl@math.uwaterloo.ca)
