Abstract: *Isatis takhtajanii* Avestisian is reported as a new record from western Iran. It is close to *I. tinctoria* L.; a list of diagnostic differences is provided. A more complete description of *I. takhtajanii* and a distribution map are given. *Isatis koeiei* Rech.f. is reduced to a synonym of *I. raphanifolia* Boiss. Iranian records of *I. spectabilis* Davis and *I. tinctoria* subsp. *tomentella* (Boiss.) Davis are considered to be misidentifications of *I. kotschyana* Boiss. & Hohen.

Key Words: *Isatis*, Brassicaceae, new record, new synonym, Iran
