**Abstract:** Herein, macrofungi specimens that were collected from different locations in Karaman province, Turkey between 1999 and 2001 are reported. As a result of field and laboratory studies, 202 taxa belonging to 2 classes and 41 families were identified. Of them, 11 taxa belonged to Ascomycetes and 191 to Basidiomycetes. The most common families were Tricholomataceae, with 36 species; Bolbitiaceae, with 16 species; Agaricaceae and Cortinariaceae, with 15 species each; Coprinaceae, with 13 species; and Hymenochaetaceae, with 12 species.

**Key Words:** Macrofungi, Karaman, Turkey
