On the Circumscription of *Isatis tinctoria* L. (Brassicaceae) in Iran

Hamid MOAZZENI, Shahin ZARRE

Research Centre of Plant Sciences, School of Biology, University College of Science, Tehran University, PO Box: 14155-6455, Tehran - IRAN

**Abstract:** In the course of preparing a revision of *Isatis* L. and its allies in Iran, we verified *Isatis tinctoria* L. among the material studied. Although it has been previously recorded for Iran, we give a more extensive description and a map of its distribution in Iran. A key to distinguishing this species from its allies and a discussion of the affinities in this group are provided.

**Key Words:** Brassicaceae, *Isatis tinctoria*, Iran
