Abstract: This study was conducted on macrofungi specimens collected from Erzurum province between 1997 and 2000. As a result, 114 macrofungi species belonging to 29 families and two classes were identified. Two of them, *Melanoleuca humilis* (Pers.: Fr.) Sing. and *Tricholoma lascivum* (Fr.) Gill. (Tricholomataceae), are new records for the macrofungi flora of Turkey.

Key Words: Macrofungi, Flora, Erzurum, Turkey.
