The Liverworts ( Hepaticae) of Uludağ National Park (Bursa)

Barbaros ÇETİN

University of Ankara, Faculty of Science, Department of Biology, 06100, Ankara-TURKEY

**Abstract:** During the vegetation period, a total of 52 plant specimens were collected from Uludağ National Park (Bursa) between 1988 and 1989. At the end of this investigation, 23 liverwort species were identified, belonging to 15 families and 17 genera. Of these, 4 taxa are new for the AI grid-square. *Jungermannia hyalina* Lyell, *Marsupella funcckii* (Web. & Mohr) Dum and *Calypogeia azurea* Stotler & Crotz, are reported for the second time from Turkey.
