Larval Development of *Menaethiops bicornis* Alcock, 1895, Reared Under Laboratory  
Conditions (Crustacea: Decapoda: Majidae)

Farhana Shafiq GHORY, Feroz Akhtar SIDDIQUI

Marine Reference Collection and Resource Centre, University of Karachi, Karachi-75270 - PAKISTAN

**Abstract:** Larval development of *Menaethiops bicornis* Alcock, 1895 was carried out under laboratory conditions during 1996 from an ovigerous female to the second zoeal stage at room temperature, 27- 29 °C, with a salinity of seawater at 35-37 ‰; and pH 7.9. The larvae are illustrated, described and also compared with the laboratory reared larvae of *M. nodulosus* described by Ghory and Siddiqui (2002) from Pakistan.

**Key Words:** Decapoda, Majidae, Larval development of *Menaethiops bicornis*, Pakistan
