**Abstract:** In this study, the materials collected from 30 stations at different locations at Lake Eğirdir were evaluated. According to the results, a total of 12 species belonging to 11 genera of the superfamilies Darwinulidacea and Cypridacea were determined. Of these, *Potomocypris variegata* (Brady & Norman, 1889) is a new record from Anatolia. At the same time, the parthenogenetic populations of *Plesiocypridopsis newtoni* (Brady & Robertson, 1870) are reported from Anatolia in this study for the first time.

**Key Words:** The Eğirdir Lake, Crustacea, Ostracod

Turk. J. Zool., **25**, (2001), 421-425.
