Abstract: This study was conducted at Lake Eğirdir in the summer (July), autumn (September), winter (February) and spring (April) of 1997. The materials collected from 41 stations were analysed and 19 species (*Ilyocypris biplicata*, *Ilyocypris bradyi*, *Ilyocypris gibba*, *Candona neglecta*, *Cypris pubera*, *Prionocypris zenkeri*, *Eucypris inflata*, *Eucypris virens*, *Heterocypris incongruens*, *Cyprinotus inaequalis*, *Cypria ophtalmica*, *Physocypris kraepelini*, *Cypridopsis hartwigi*, *Cypridopsis vidua*, *Plesiocypridopsis newtoni*, *Potamocypris varigeata*, *Psychrodromus olivaceus*, *Darwinula stevensoni* and *Limnocythere inopinata*) belonging to 15 genera were recorded. *Cypridopsis hartwigi* is a new record for the Ostracoda fauna of Turkey.

Key Words: Freshwater, Ostracoda, Taxonomy, Seasonal Distribution, Lake Eğirdir, Turkey
