Checklist of Tabanidae (Diptera) From Turkey

A. Yavuz KILIÇ

Department of Biology, Faculty of Science, Anadolu University, 26470 Eskişehir-TURKEY

Abstract: After a review of the literature on the Tabanidae fauna of Turkey, it was found that 156 species and 12 subspecies have been reported. Twelve of the species are from the subfamily Pangoninae, 19 species and 2 subspecies are from the subfamily Chrysopsinae and 125 species and 10 subspecies are from the subfamily Tabaninae.
