A New Record of *Acaropsella volgini*(Acari: Prostigmata, Cheyletidae) for the Fauna of Turkey

Kamil KOÇ

Department of Biology, Faculty of Arts and Sciences, Atatürk University, 25240, Erzurum-TURKEY

Abstract: In this study, the characteristic features of *Acaropsella volgini* (Gerson, 1967), a new record for the Turkish fauna, are given for the first time based on the drawings made from our specimens. In addition, their distribution is presented.

Key Words: *Acaropsella volgini*, Acari, Prostigmata, Cheyletidae, new record, Systematics, Turkey.

Turk. J. Zool., **22**, (1998), 195-198.
