Dodecahedral bowling

[Amelia Carolina Sparavigna](#)

(Submitted on 13 Apr 2012)

Here I am proposing a possible use of Roman Dodecahedra, which are bronze artifacts of gallo-roman origin dating from the 2nd or 3rd centuries AD, for playing a bowling game. The presence of holes and knobs can be quite important during collisions.

Comments: The study of motion and collisions can help in understanding some ancient artifacts
